Lesson Planning

Complete Lesson Plan Book

Class: Class 11 – ICom

Subject: Economics

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Introduction: Basic Economic Problems

Unit 2: Demand: Law, Schedule and Elasticity

Unit 3: Supply and Market Equilibrium

Unit 4: Consumer Behaviour and Utility

Unit 5: Production and Cost Concepts

Unit 6: Perfect Competition

Unit 7: Monopoly and Monopolistic Competition

Unit 8: Factor Pricing: Rent, Wages, Interest, Profit

DM

Unit 1: Introduction: Basic Economic Problems

Learning Objectives

• Define economics and its subject matter.

• Explain the three basic problems: what, how, for whom.

• Describe how different systems solve these problems.

Key Concepts

• Economics: study of choice under scarcity.

• Wants are unlimited; resources are limited.

• What to produce, how to produce, for whom to produce.

• Market, command and mixed economies compared.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Introduction: Basic Economic Problems to activate prior knowledge.

2. Present the core ideas of Introduction: Basic Economic Problems with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Introduction: Basic Economic Problems.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Introduction: Basic Economic Problems and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Introduction: Basic Economic Problems for classroom display.

Assessment Questions

1. Define economics. What is its central problem?

2. Explain the three basic economic problems.

3. How does a market economy solve 'what to produce'?

Homework

• Write a one-page summary of Introduction: Basic Economic Problems in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 2: Demand: Law, Schedule and Elasticity

Learning Objectives

• State and explain the law of demand.

• Draw a demand schedule and curve.

• Calculate price elasticity of demand.

Key Concepts

• Law: price rises, quantity demanded falls.

• Demand schedule, curve and its downward slope.

• Shifts vs movements along the curve.

• Elasticity: responsive vs necessary goods.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Demand: Law, Schedule and Elasticity to activate prior knowledge.

2. Present the core ideas of Demand: Law, Schedule and Elasticity with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Demand: Law, Schedule and Elasticity.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Demand: Law, Schedule and Elasticity and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Demand: Law, Schedule and Elasticity for classroom display.

Assessment Questions

1. State the law of demand with a schedule.

2. Distinguish a shift from a movement along the curve.

3. Calculate elasticity when price falls 10% and demand rises 20%.

Homework

• Write a one-page summary of Demand: Law, Schedule and Elasticity in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 3: Supply and Market Equilibrium

Learning Objectives

• State and explain the law of supply.

• Find equilibrium price and quantity.

• Explain the effects of shifts in demand and supply.

Key Concepts

• Law: higher price, larger quantity supplied.

• Equilibrium where demand equals supply.

• Surplus when price is above; shortage when below.

• Shifts change equilibrium price and quantity.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Supply and Market Equilibrium to activate prior knowledge.

2. Present the core ideas of Supply and Market Equilibrium with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Supply and Market Equilibrium.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Supply and Market Equilibrium and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Supply and Market Equilibrium for classroom display.

Assessment Questions

1. State the law of supply with a diagram.

2. Find equilibrium from the given schedules.

3. What happens when demand rises but supply is fixed?

Homework

• Write a one-page summary of Supply and Market Equilibrium in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 4: Consumer Behaviour and Utility

Learning Objectives

• Explain total and marginal utility.

• State the law of diminishing marginal utility.

• Derive the demand curve from utility analysis.

Key Concepts

• Utility: satisfaction from consuming a good.

• Marginal utility falls with each extra unit.

• Consumer equilibrium: MUx/Px = MUy/Py.

• Paradox of value: water vs diamonds.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Consumer Behaviour and Utility to activate prior knowledge.

2. Present the core ideas of Consumer Behaviour and Utility with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Consumer Behaviour and Utility.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Consumer Behaviour and Utility and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Consumer Behaviour and Utility for classroom display.

Assessment Questions

1. State the law of diminishing marginal utility.

2. Explain consumer equilibrium with an example.

3. Why are diamonds costly but water cheap?

Homework

• Write a one-page summary of Consumer Behaviour and Utility in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 5: Production and Cost Concepts

Learning Objectives

• Distinguish the factors of production.

• Explain total, average and marginal product.

• Classify costs: fixed, variable, total, marginal.

Key Concepts

• Factors: land, labour, capital, organisation.

• Law of diminishing returns in the short run.

• Fixed costs vs variable costs.

• Marginal cost guides production decisions.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Production and Cost Concepts to activate prior knowledge.

2. Present the core ideas of Production and Cost Concepts with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Production and Cost Concepts.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Production and Cost Concepts and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Production and Cost Concepts for classroom display.

Assessment Questions

1. Name the four factors of production.

2. State the law of diminishing returns.

3. Distinguish fixed and variable costs with examples.

Homework

• Write a one-page summary of Production and Cost Concepts in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 6: Perfect Competition

Learning Objectives

• State the features of perfect competition.

• Explain price determination under perfect competition.

• Describe the firm's equilibrium in the short run.

Key Concepts

• Many sellers, identical product, free entry.

• Firm is a price taker; AR = MR = Price.

• Equilibrium where MC = MR.

• Short-run profit, loss and shut-down point.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Perfect Competition to activate prior knowledge.

2. Present the core ideas of Perfect Competition with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Perfect Competition.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Perfect Competition and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Perfect Competition for classroom display.

Assessment Questions

1. State four features of perfect competition.

2. Why is the firm a price taker?

3. Explain the shut-down point of a firm.

Homework

• Write a one-page summary of Perfect Competition in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 7: Monopoly and Monopolistic Competition

Learning Objectives

• Define monopoly and state its features.

• Explain price discrimination.

• Describe monopolistic competition with examples.

Key Concepts

• Monopoly: single seller, no close substitutes.

• Barriers: patents, licences, natural monopoly.

• Price discrimination: different prices, same good.

• Monopolistic competition: many sellers, differentiated products.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Monopoly and Monopolistic Competition to activate prior knowledge.

2. Present the core ideas of Monopoly and Monopolistic Competition with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Monopoly and Monopolistic Competition.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Monopoly and Monopolistic Competition and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Monopoly and Monopolistic Competition for classroom display.

Assessment Questions

1. Define monopoly. State its three features.

2. What is price discrimination? Give an example.

3. Distinguish monopoly and monopolistic competition.

Homework

• Write a one-page summary of Monopoly and Monopolistic Competition in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)

Unit 8: Factor Pricing: Rent, Wages, Interest, Profit

Learning Objectives

• Explain the theory of rent.

• Describe how wages are determined.

• Explain interest and profit as factor rewards.

Key Concepts

• Rent: reward for land; Ricardian theory.

• Wages: price of labour; real vs nominal wages.

• Interest: reward for capital; time preference.

• Profit: reward for risk-taking and organisation.

Teaching Methodology (Step by Step)

1. Warm-up: ask students what they already know about Factor Pricing: Rent, Wages, Interest, Profit to activate prior knowledge.

2. Present the core ideas of Factor Pricing: Rent, Wages, Interest, Profit with clear board notes, definitions and real-life examples.

3. Explain each key concept in sequence, using questions to check understanding at every stage.

4. Guided practice: short written exercises and class discussion applying Factor Pricing: Rent, Wages, Interest, Profit.

5. Recap the main points, clear remaining doubts and close with a quick oral quiz.

Classroom Activities

• Pair activity: students discuss the key ideas of Factor Pricing: Rent, Wages, Interest, Profit and present a two-minute summary to the class.

• Group task: prepare a wall chart or mind map on Factor Pricing: Rent, Wages, Interest, Profit for classroom display.

Assessment Questions

1. Explain Ricardo's theory of rent.

2. Distinguish real and nominal wages.

3. Why does the entrepreneur earn profit?

Homework

• Write a one-page summary of Factor Pricing: Rent, Wages, Interest, Profit in your notebook.

• Attempt the exercise questions given at the end of the chapter.

Time Allocation

2 periods (80 minutes)
