Lesson Planning

Complete Lesson Plan Book

Class: Class 3

Subject: Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Parts of a Plant

DM

Unit 1: Parts of a Plant

Learning Objectives

• Students will name the main parts of a plant: root, stem, leaf, flower and fruit.

• Students will describe the job of each part of a plant.

• Students will label the parts of a plant on a diagram.

Key Concepts

• A plant has five main parts: root, stem, leaf, flower and fruit.

• Roots grow under the ground; they hold the plant in the soil and take in water.

• The stem holds the plant up and carries water from the roots to the leaves.

• Leaves make food for the plant using sunlight, air and water.

• Flowers grow into fruits, and fruits carry seeds that grow into new plants.

Teaching Methodology (Step by Step)

1. The teacher shows a real plant and asks students to point to its different parts.

2. The teacher draws a big plant on the board and labels the root, stem, leaf, flower and fruit with the class.

3. The teacher explains the job of the root and asks why plants need strong roots.

4. The teacher explains the job of the stem and the leaf, showing how water travels up the stem.

5. The teacher explains that flowers become fruits and fruits carry seeds.

6. The teacher gives each student a blank plant diagram to label.

Classroom Activities

• Label the plant: students label the five parts of a plant on a worksheet diagram.

• Plant match: students match each plant part to its job on a matching card game.

• My plant: students draw their favourite plant and label its parts with colours.

Assessment Questions

1. Name the five main parts of a plant.

2. What is the job of the roots? What is the job of the leaves?

3. Which part of the plant grows into a fruit?

Homework

• Draw a plant in your notebook and label its five parts.

• Look at a plant at home and write one sentence about each of its parts.
