Lesson Planning

Complete Lesson Plan Book

Class: Class 1

Subject: Computer

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: What Is a Computer?

Unit 2: Parts of a Computer

Unit 3: Using the Mouse

Unit 4: Using the Keyboard

Unit 5: Switching the Computer On and Off

Unit 6: Drawing in Paint

DM

Unit 1: What Is a Computer?

Learning Objectives

• Students will tell what a computer is in simple words.

• Students will name two things a computer can do.

• Students will show care while using a computer.

Key Concepts

• A computer is an electronic machine.

• A computer helps us learn, draw and play.

• A computer works fast and never gets tired.

• We should use a computer with clean hands.

Teaching Methodology (Step by Step)

1. The teacher shows a real computer to the class.
2. Students name the parts they can see.
3. The teacher explains what a computer does with examples.
4. Students watch the teacher open a drawing program.
5. Students take turns to touch the mouse gently.

Classroom Activities

• Draw a computer and label its screen.

• Computer rhymes and action songs.

Assessment Questions

1. What is a computer?
2. Name two things a computer can do.
3. Is a computer a machine?
4. How should we touch a computer?

Homework

• Draw a computer in your notebook.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 2: Parts of a Computer

Learning Objectives

• Students will name the four main parts of a computer.

• Students will match each part with its use.

• Students will point to each part on a real computer.

Key Concepts

• The monitor shows us pictures and words.

• The keyboard has buttons to type letters.

• The mouse moves the arrow on the screen.

• The CPU is the brain of the computer.

Teaching Methodology (Step by Step)

1. The teacher points to each part of a real computer.
2. Students repeat the name of each part.
3. The teacher explains the use of every part.
4. Students match part cards with use cards.
5. Students label the parts on a computer diagram.

Classroom Activities

• Label the parts on a big computer chart.

• Touch and name: the teacher names a part, students point to it.

Assessment Questions

1. Name the four parts of a computer.
2. Which part shows pictures?
3. Which part is called the brain of the computer?
4. What do we use the mouse for?

Homework

• Draw a computer and label its four parts.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 3: Using the Mouse

Learning Objectives

• Students will hold the mouse correctly.

• Students will move the pointer on the screen.

• Students will click to open a simple program.

Key Concepts

• The mouse controls the arrow called the pointer.

• Moving the mouse moves the pointer on the screen.

• A click means pressing the left button once.

• A double click opens most programs.

Teaching Methodology (Step by Step)

1. The teacher shows the correct way to hold the mouse.
2. Students practise holding the mouse one by one.
3. The teacher moves the pointer and students watch.
4. Students take turns moving the pointer to a target.
5. Students practise clicking to open the Paint program.

Classroom Activities

• Pointer race: move the pointer to the star first.

• Click the balloon game on the screen.

Assessment Questions

1. How do we hold the mouse?
2. What is the arrow on the screen called?
3. What does a single click do?
4. Show how to move the pointer to the corner.

Homework

• Practise holding a mouse shape made of clay.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 4: Using the Keyboard

Learning Objectives

• Students will name the main groups of keys.

• Students will type their name using the keyboard.

• Students will use the spacebar and backspace keys.

Key Concepts

• The keyboard has letter keys, number keys and special keys.

• The spacebar makes a space between words.

• The backspace key erases the letter on the left.

• The enter key moves to a new line.

Teaching Methodology (Step by Step)

1. The teacher shows the keyboard and names the key groups.
2. Students find the letters of their name on the keyboard.
3. The teacher opens Notepad for typing practice.
4. Students type their names one by one with help.
5. Students practise the spacebar and backspace keys.

Classroom Activities

• Type your name in Notepad.

• Key hunt: find the asked letter key quickly.

Assessment Questions

1. Name three groups of keys on the keyboard.
2. Which key makes a space between words?
3. Which key erases a letter?
4. Type your name using the keyboard.

Homework

• Draw a keyboard and colour the spacebar.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 5: Switching the Computer On and Off

Learning Objectives

• Students will switch on the computer in the correct order.

• Students will shut down the computer properly.

• Students will tell why we shut down properly.

Key Concepts

• First we switch on the CPU, then the monitor.

• We wait for the computer to start fully.

• We close all programs before shutting down.

• Pulling the plug can harm the computer.

Teaching Methodology (Step by Step)

1. The teacher shows the power buttons on the CPU and monitor.
2. Students watch the teacher start the computer step by step.
3. Students repeat the steps of starting in order.
4. The teacher shows the proper shutdown steps.
5. Students practise the steps on a chart before the real computer.

Classroom Activities

• Step cards: arrange the start and shutdown steps in order.

• Role play the computer start routine.

Assessment Questions

1. Which part do we switch on first?
2. What should we close before shutting down?
3. Why should we not pull the plug?
4. Show the steps to start a computer.

Homework

• Draw the steps to switch on a computer.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 6: Drawing in Paint

Learning Objectives

• Students will open the Paint program.

• Students will draw lines and shapes with the mouse.

• Students will colour their drawing with the fill tool.

Key Concepts

• Paint is a program for drawing on the computer.

• The pencil tool draws free lines.

• The shape tools draw circles and squares.

• The fill tool colours a closed shape.

Teaching Methodology (Step by Step)

1. The teacher opens Paint and shows the tools.
2. Students name each tool after the teacher.
3. The teacher draws a house using shape tools.
4. Students take turns to draw one shape each.
5. Students colour their shapes with the fill tool.

Classroom Activities

• Draw your house in Paint.

• Free drawing time with the pencil tool.

Assessment Questions

1. How do we open Paint?
2. Which tool draws a circle?
3. Which tool colours a shape?
4. Draw a sun in Paint.

Homework

• Draw your favourite fruit on paper.

Time Allocation

4 periods of 35 minutes each.
