# Lesson Planning

## Complete Lesson Plan Book

**Class: Class 1**

**Subject: Mathematics**

**Medium: English**

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

# Table of Contents

Unit 1: Counting 1 to 10

Unit 2: Counting 11 to 20

Unit 3: Number Names One to Ten

Unit 4: Addition within 10

Unit 5: Subtraction within 10

Unit 6: Shapes: Circle, Triangle and Square

DM

# Unit 1: Counting 1 to 10

## Learning Objectives

• Students will count objects from 1 to 10 correctly.

• Students will recognise the numerals 1 to 10.

• Students will write the numerals 1 to 10 in order.

## Key Concepts

• Counting tells us how many things there are.

• The numbers 1 to 10 come in a fixed order.

• Each number has a name and a numeral shape.

• We count one object only once.

## Teaching Methodology (Step by Step)

1. The teacher counts ten pencils aloud while students watch.
2. Students count the pencils together with the teacher.
3. The teacher shows numeral cards 1 to 10 and reads each one.
4. Students match numeral cards with groups of objects.
5. Students write the numerals 1 to 10 in their notebooks.

## Classroom Activities

• Count the windows, doors and desks in the classroom.

• Number hop: jump while counting from 1 to 10.

## Assessment Questions

1. Count the books on the teacher table.
2. Which number comes after 6?
3. Write the numerals 1 to 10 in your notebook.
4. Show 7 fingers.

## Homework

• Count ten things at home and tell their names.

## Time Allocation

4 periods of 35 minutes each.

DM

# Unit 2: Counting 11 to 20

## Learning Objectives

• Students will count objects from 11 to 20 correctly.

• Students will recognise the numerals 11 to 20.

• Students will tell which number comes before and after a given number.

## Key Concepts

• The numbers 11 to 20 continue the counting order.

• Eleven means ten and one more.

• Twenty is two full groups of ten.

• Counting in order helps us add and subtract later.

## Teaching Methodology (Step by Step)

1. The teacher revises 1 to 10 and introduces 11 to 20 with sticks.
2. Students bundle ten sticks and count the extra ones aloud.
3. The teacher shows numeral cards 11 to 20 on the board.
4. Students arrange the cards 11 to 20 in the correct order.
5. Students count classroom objects in groups up to 20.

## Classroom Activities

• Make bundles of ten pencils and count the rest.

• Number line walk: step forward while counting 11 to 20.

## Assessment Questions

1. Count 15 buttons from the counting box.
2. Which number comes between 13 and 15?
3. Write the numerals 11 to 20 in your notebook.
4. Is 18 bigger or smaller than 14?

## Homework

• Count the stairs of your home up to 20.

## Time Allocation

4 periods of 35 minutes each.

# Unit 3: Number Names One to Ten

## Learning Objectives

• Students will read the number names one to ten.

• Students will match each numeral with its number name.

• Students will write number names in words.

## Key Concepts

• Every numeral has a name written in words.

• 1 is one, 2 is two, 3 is three, 4 is four, 5 is five.

• 6 is six, 7 is seven, 8 is eight, 9 is nine, 10 is ten.

• Number names help us read prices and signs.

## Teaching Methodology (Step by Step)

1. The teacher writes numerals 1 to 10 with their names on the board.
2. Students read the number names aloud together.
3. Students match numeral cards with word cards in pairs.
4. The teacher calls a numeral, students hold up its word card.
5. Students write number names one to ten in their notebooks.

## Classroom Activities

• Number name bingo with word cards.

• Label ten classroom objects with their number names.

## Assessment Questions

1. Read the words: four, seven, nine.
2. Match the numeral 8 with its name.
3. Write the names of 3, 5 and 10 in words.
4. Which word names the numeral 2?

## Homework

• Write number names one to ten once in the notebook.

## Time Allocation

3 periods of 35 minutes each.

DM

# Unit 4: Addition within 10

## Learning Objectives

• Students will add two small numbers with a total up to 10.

• Students will use objects to find addition answers.

• Students will write addition sentences with the plus sign.

## Key Concepts

• Addition means putting two groups together.

• The plus sign + tells us to add.

• 3 + 2 = 5 means three and two more make five.

• We can add by counting all the objects together.

## Teaching Methodology (Step by Step)

1. The teacher puts 3 pencils and 2 pencils together and counts them all.
2. Students repeat the addition sentence 3 + 2 = 5 aloud.
3. Students use their own pencils to solve 4 + 3.
4. The teacher shows how to write addition sentences on the board.
5. Students solve five addition sums in their notebooks.

## Classroom Activities

• Shop game: buy two groups of toys and count the total.

• Addition dominoes: match the sum card with the answer card.

## Assessment Questions

1. Solve: 5 + 2 = ?
2. Draw 6 stars and 2 stars. How many stars in all?
3. Write one addition sentence of your own.

## Homework

• Solve five addition sums within 10 at home.

## Time Allocation

5 periods of 35 minutes each.

# Unit 5: Subtraction within 10

## Learning Objectives

• Students will subtract a small number from a number up to 10.

• Students will use objects to find subtraction answers.

• Students will write subtraction sentences with the minus sign.

## Key Concepts

• Subtraction means taking away from a group.

• The minus sign - tells us to subtract.

• 5 - 2 = 3 means take two away from five, three are left.

• We can subtract by counting what remains.

## Teaching Methodology (Step by Step)

1. The teacher holds 6 pencils, gives away 2, and counts the rest.
2. Students repeat the subtraction sentence 6 - 2 = 4 aloud.
3. Students use buttons to solve 7 - 3 on their desks.
4. The teacher shows how to write subtraction sentences on the board.
5. Students solve five subtraction sums in their notebooks.

## Classroom Activities

• Take-away game: eat some biscuits and count the rest.

• Subtraction bowling: knock pins down and count what stands.

## Assessment Questions

1. Solve: 9 - 4 = ?
2. Draw 7 apples, cross out 2. How many remain?
3. Write one subtraction sentence of your own.

## Homework

• Solve five subtraction sums within 10 at home.

## Time Allocation

5 periods of 35 minutes each.

# Unit 6: Shapes: Circle, Triangle and Square

## Learning Objectives

• Students will recognise the circle, triangle and square.

• Students will name the shapes of common objects.

• Students will draw the three shapes.

## Key Concepts

• A circle is perfectly round with no corners.

• A triangle has three sides and three corners.

• A square has four equal sides and four corners.

• Shapes are everywhere around us.

## Teaching Methodology (Step by Step)

1. The teacher draws a big circle, triangle and square on the board.
2. Students name each shape aloud together.
3. Students find one object of each shape in the classroom.
4. Students trace the shapes in the air and then on paper.
5. Students draw and colour the three shapes in their notebooks.

## Classroom Activities

• Shape hunt in the school ground in small groups.

• Make pictures of a house and a car using the three shapes.

## Assessment Questions

1. How many sides does a square have?
2. Name something in the classroom shaped like a circle.
3. Draw a triangle and a square in your notebook.
4. Which shape has no corners?

## Homework

• Find three round things at home and name them.

## Time Allocation

3 periods of 35 minutes each.
