Lesson Planning

Complete Lesson Plan Book

Class: Class 1

Subject: Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Parts of My Body

Unit 2: Living and Non-Living Things

Unit 3: Plants Around Us

Unit 4: Animals and Their Homes

Unit 5: Day and Night

Unit 6: Keeping Clean and Healthy

DM

Unit 1: Parts of My Body

Learning Objectives

• Students will name ten parts of the body.

• Students will point to each body part on command.

• Students will tell the use of eyes, ears, nose and hands.

Key Concepts

• We see with our eyes and hear with our ears.

• We smell with our nose and taste with our tongue.

• We hold things with our hands and walk with our legs.

• Every part of the body has a special job.

Teaching Methodology (Step by Step)

1. The teacher points to each body part and names it.
2. Students repeat the names and point to their own body parts.
3. The teacher asks: what do we do with our eyes?
4. Students play a quick pointing game with the teacher.
5. Students draw themselves and label five body parts.

Classroom Activities

• Head and shoulders song with body part actions.

• Label the body parts on a big classroom chart.

Assessment Questions

1. Point to your nose and ears.
2. What do we see with?
3. Name three parts of the body.
4. What do we walk with?

Homework

• Draw yourself and label five body parts.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 2: Living and Non-Living Things

Learning Objectives

• Students will tell the difference between living and non-living things.

• Students will name three living and three non-living things.

• Students will sort picture cards into two groups.

Key Concepts

• Living things need food, water and air.

• Living things grow and can move by themselves.

• Plants, animals and people are living things.

• Non-living things like stones and chairs do not grow.

Teaching Methodology (Step by Step)

1. The teacher shows pictures of a cat, a tree, a stone and a chair.
2. Students tell which ones are living and which are not.
3. The teacher explains the signs of living things.
4. Students sort picture cards into living and non-living groups.
5. Students find living and non-living things in the classroom.

Classroom Activities

• Sorting race: teams sort mixed picture cards the fastest.

• Draw one living and one non-living thing.

Assessment Questions

1. Is a bird a living thing? Why?
2. Name two non-living things in the classroom.
3. Do plants need water?
4. Sort these: fish, book, dog, table.

Homework

• Find three living things at home and name them.

Time Allocation

4 periods of 35 minutes each.

Unit 3: Plants Around Us

Learning Objectives

• Students will name the parts of a plant.

• Students will tell what plants need to grow.

• Students will plant a seed and watch it grow.

Key Concepts

• A plant has roots, a stem, leaves and flowers.

• Roots grow under the soil and hold the plant.

• Plants need water, sunlight and air to grow.

• We get fruits, vegetables and shade from plants.

Teaching Methodology (Step by Step)

1. The teacher shows a real plant and names its parts.
2. Students repeat the parts and point at them.
3. The teacher explains what plants need to grow.
4. Students plant bean seeds in small cups with soil.
5. Students water their seeds and place them in sunlight.

Classroom Activities

• Seed planting activity in small paper cups.

• Leaf rubbing art with leaves collected from the ground.

Assessment Questions

1. Name the parts of a plant.
2. What do plants need to grow?
3. Where do the roots of a plant grow?
4. Name one thing we get from plants.

Homework

• Water your seed cup and watch it every day.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 4: Animals and Their Homes

Learning Objectives

• Students will name six common animals.

• Students will tell where each animal lives.

• Students will match animals with their homes.

Key Concepts

• A lion lives in a den and a bird lives in a nest.

• A fish lives in water and a rabbit lives in a burrow.

• A dog lives in a kennel and a horse lives in a stable.

• Every animal has a home that keeps it safe.

Teaching Methodology (Step by Step)

1. The teacher shows animal pictures and names each one.
2. Students repeat the animal names after the teacher.
3. The teacher shows homes: den, nest, burrow, kennel and stable.
4. Students match each animal card with its home card.
5. Students draw their favourite animal with its home.

Classroom Activities

• Animal sound game: guess the animal from its sound.

• Build a nest with twigs and cotton for a toy bird.

Assessment Questions

1. Where does a bird live?
2. Name the home of a lion.
3. Match: fish, dog, rabbit with their homes.
4. Name three animals you have seen.

Homework

• Draw your favourite animal and its home.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 5: Day and Night

Learning Objectives

• Students will tell what we see in the day and at night.

• Students will explain that the sun gives us daylight.

• Students will name activities done in the day and at night.

Key Concepts

• The sun shines in the sky during the day.

• At night the sun sets and the moon and stars appear.

• We go to school and play during the day.

• We sleep at night to rest our bodies.

Teaching Methodology (Step by Step)

1. The teacher shows day and night pictures side by side.
2. Students name what they see in each picture.
3. The teacher explains the rising and setting of the sun.
4. Students sort activity cards into day and night groups.
5. Students draw a day scene and a night scene.

Classroom Activities

• Day and night sorting game with activity cards.

• Make a sun and moon mask for a class rhyme.

Assessment Questions

1. What shines in the sky during the day?
2. What do we see in the sky at night?
3. Name two things you do during the day.
4. When do we sleep?

Homework

• Draw the moon and stars you see at night.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 6: Keeping Clean and Healthy

Learning Objectives

• Students will name five habits that keep us clean.

• Students will tell why we wash hands before eating.

• Students will brush teeth and wash hands correctly.

Key Concepts

• Washing hands before eating keeps germs away.

• Brushing teeth twice a day keeps teeth strong.

• Bathing daily keeps our body fresh and clean.

• Clean habits keep us healthy and strong.

Teaching Methodology (Step by Step)

1. The teacher shows the steps of hand washing with soap.
2. Students practise the hand washing steps at the tap.
3. The teacher shows the correct way to brush teeth.
4. Students practise brushing movements on a teeth model.
5. Students make a clean habits chart for the classroom.

Classroom Activities

• Hand washing relay at the school taps.

• Germs tag: one student is the germ, soap saves the rest.

Assessment Questions

1. Name three habits that keep us clean.
2. When should we wash our hands?
3. How many times should we brush our teeth daily?
4. Why do we bathe every day?

Homework

• Wash your hands before every meal today.

Time Allocation

3 periods of 35 minutes each.
