# Lesson Planning

## Complete Lesson Plan Book

**Class: Class 2**

**Subject: Computer**

**Medium: English**

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

# Table of Contents

Unit 1: The CPU: Brain of the Computer

Unit 2: The Monitor and Its Uses

Unit 3: Typing Practice

Unit 4: Notepad Basics

Unit 5: Computer Safety and Manners

Unit 6: Storage Devices

DM

# Unit 1: The CPU: Brain of the Computer

## Learning Objectives

• Students will tell what CPU stands for in simple words.
• Students will tell that the CPU is the brain of the computer.
• Students will point to the CPU on a real computer.

## Key Concepts

• CPU means Central Processing Unit.
• The CPU does all the thinking of the computer.
• It follows our instructions very fast.
• Without the CPU the computer cannot work.

## Teaching Methodology (Step by Step)

1. The teacher shows the CPU box of a real computer.
2. Students repeat: the CPU is the brain of the computer.
3. The teacher explains that it follows instructions.
4. Students watch the CPU light blink while working.
5. Students draw and label the CPU.

## Classroom Activities

• Draw the CPU and label it as the brain.
• Instruction game: follow the teacher instructions fast like a CPU.

## Assessment Questions

1. What does CPU stand for?
2. Which part is the brain of the computer?
3. What does the CPU do?
4. Point to the CPU on the computer.

## Homework

• Draw a computer and circle its brain.

## Time Allocation

3 periods of 35 minutes each.

DM

# Unit 2: The Monitor and Its Uses

## Learning Objectives

• Students will tell what a monitor is.

• Students will name three things we see on a monitor.

• Students will show care while using the monitor.

## Key Concepts

• The monitor is the screen of the computer.

• We see pictures, words and videos on the monitor.

• It shows the result of our work.

• We should not touch the screen with dirty fingers.

## Teaching Methodology (Step by Step)

1. The teacher points to the monitor of a real computer.
2. Students name things they can see on the screen.
3. The teacher opens a picture and a video.
4. Students watch and name what appears.
5. Students practise sitting at the right distance.

## Classroom Activities

• Draw what you see on a monitor.

• Name five things you can watch on a monitor.

## Assessment Questions

1. What is a monitor?
2. Name three things we see on a monitor.
3. Should we touch the screen with dirty hands?
4. How far should we sit from the monitor?

## Homework

• Draw a monitor showing your favourite cartoon.

## Time Allocation

3 periods of 35 minutes each.

DM

# Unit 3: Typing Practice

## Learning Objectives

• Students will place fingers correctly on the keyboard.

• Students will type simple words with both hands.

• Students will type their full name and class.

## Key Concepts

• The home row keys are a, s, d, f, j, k, l.

• We use both hands to type fast.

• Looking at the screen while typing is a good habit.

• Practice makes our typing fast.

## Teaching Methodology (Step by Step)

1. The teacher shows the home row keys.
2. Students place their fingers on the home row.
3. The teacher opens Notepad for practice.
4. Students type simple words like cat and dog.
5. Students type their names with both hands.

## Classroom Activities

• Typing race: type five words correctly the fastest.

• Type your name ten times without looking at keys.

## Assessment Questions

1. Name the home row keys.
2. Which hands do we use for typing?
3. Type your full name in Notepad.
4. Why should we look at the screen while typing?

## Homework

• Practise typing your name five times.

## Time Allocation

4 periods of 35 minutes each.

DM

# Unit 4: Notepad Basics

## Learning Objectives

• Students will open the Notepad program.

• Students will type and save a small text.

• Students will open a saved file again.

## Key Concepts

• Notepad is a simple program for writing text.

• We type our words in the white area.

• Saving keeps our work safe in the computer.

• We can open saved work and read it again.

## Teaching Methodology (Step by Step)

1. The teacher opens Notepad from the start menu.
2. Students watch each click carefully.
3. Students take turns to type one sentence each.
4. The teacher shows how to save the file.
5. Students open the saved file again.

## Classroom Activities

• Type your favourite rhyme in Notepad and save it.

• Open the saved file and read it aloud.

## Assessment Questions

1. How do we open Notepad?
2. Why do we save our work?
3. Type one sentence in Notepad.
4. How do we open a saved file?

## Homework

• Draw the steps to save a file.

## Time Allocation

4 periods of 35 minutes each.

DM

# Unit 5: Computer Safety and Manners

## Learning Objectives

• Students will name five computer safety rules.

• Students will follow the rules in the computer lab.

• Students will tell why we share computers fairly.

## Key Concepts

• We enter the lab quietly in a line.

• We use the computer with clean and dry hands.

• We never pull wires or plugs.

• We share the computer turn by turn.

## Teaching Methodology (Step by Step)

1. The teacher shows the lab rules chart.
2. Students read each rule aloud.
3. The teacher explains why each rule matters.
4. Students practise entering the lab in a line.
5. Students promise to follow the lab rules.

## Classroom Activities

• Make a lab rules poster for the computer room.

• Role play: good and bad behaviour in the lab.

## Assessment Questions

1. Name three lab rules.
2. Why should our hands be clean and dry?
3. Should we pull the wires?
4. How do we share the computer?

## Homework

• Draw one lab rule you will follow.

## Time Allocation

3 periods of 35 minutes each.

DM

# Unit 6: Storage Devices

## Learning Objectives

• Students will name three storage devices.

• Students will tell what storage means.

• Students will handle a USB drive carefully.

## Key Concepts

• Storage means keeping our work safe.

• A USB drive stores our files and fits in a pocket.

• A hard disk stores all the work inside the computer.

• A memory card stores photos in cameras and phones.

## Teaching Methodology (Step by Step)

1. The teacher shows a USB drive to the class.
2. Students hold it carefully and pass it around.
3. The teacher explains what storage means.
4. Students name things they would store.
5. Students draw the three storage devices.

## Classroom Activities

• Draw and label three storage devices.

• Pack your bag game: what would you store in a USB?

## Assessment Questions

1. Name three storage devices.
2. What does storage mean?
3. Where is the hard disk found?
4. What do we store in a memory card?

## Homework

• Draw a USB drive and colour it.

## Time Allocation

3 periods of 35 minutes each.
