Lesson Planning

Complete Lesson Plan Book

Class: Class 3

Subject: Computer

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: What Is a Computer?

Unit 2: Parts of a Computer

Unit 3: Uses of Computers

Unit 4: The Keyboard

Unit 5: The Mouse

Unit 6: Taking Care of Computers

Unit 7: Computers in Daily Life

DM

Unit 1: What Is a Computer?

Learning Objectives

• Tell what a computer is in simple words.

• Name three things a computer can do.

• Understand that computers follow our instructions.

Key Concepts

• A computer is an electronic machine.

• It works fast and never gets tired.

• It follows instructions called commands.

• Computers help us learn, play and work.

Teaching Methodology (Step by Step)

1. Show a real computer to the class.
2. Ask: what can this machine do?
3. Demonstrate turning it on and off safely.
4. Pupils name things computers do.
5. Discuss: computers are machines, not brains.

Classroom Activities

• Draw a computer and label it.

• List three things you want to do on a computer.

Assessment Questions

1. What is a computer?
2. Name two things a computer can do.
3. Does a computer get tired?
4. Who gives instructions to a computer?

Homework

• Draw a computer and write two sentences about it.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 2: Parts of a Computer

Learning Objectives

• Name the main parts of a computer.

• Tell the use of each part.

• Match parts with their names.

Key Concepts

• The monitor shows us pictures and words.

• The keyboard has keys for typing.

• The mouse moves the pointer.

• The CPU is the brain of the computer.

Teaching Methodology (Step by Step)

1. Point to each part on a real computer.
2. Pupils repeat names after you.
3. Pass around a (safe, unplugged) keyboard and mouse.
4. Match part cards with name cards.
5. Quiz: teacher points, pupils name.

Classroom Activities

• Label the parts on a computer picture.

• Build a computer model with boxes.

Assessment Questions

1. Name four parts of a computer.
2. What does the monitor do?
3. Which part do we type with?
4. Which part is called the brain?

Homework

• Draw a computer and label its four parts.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 3: Uses of Computers

Learning Objectives

• Name five uses of computers.

• Tell how computers help in school.

• Understand computers help in many jobs.

Key Concepts

• We learn lessons on computers.

• Doctors use computers in hospitals.

• Banks use computers to keep money records.

• We watch cartoons and play games too.

Teaching Methodology (Step by Step)

1. Brainstorm: where have you seen computers?
2. Show pictures of computers in offices, banks, schools.
3. Pupils share how their family uses computers.
4. Discuss: computers make work easy and fast.
5. Draw and label one use.

Classroom Activities

• Collage: pictures of computers at work.

• Interview: ask a shopkeeper if they use a computer.

Assessment Questions

1. Name three uses of computers.
2. How do computers help teachers?
3. Where do doctors use computers?
4. Name one fun use of computers.

Homework

• Write five uses of computers in your notebook.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 4: The Keyboard

Learning Objectives

• Identify important keys on the keyboard.

• Type your name using the keyboard.

• Use the spacebar and enter key correctly.

Key Concepts

• The keyboard has letter keys, number keys and special keys.

• The spacebar makes space between words.

• The enter key starts a new line.

• We type gently, not hit the keys.

Teaching Methodology (Step by Step)

1. Show a large keyboard chart.
2. Find letters of your name on the keyboard.
3. Demonstrate typing with two hands lightly.
4. Pupils take turns typing their names.
5. Practise spacebar and enter with a fun line.

Classroom Activities

• Keyboard race: who finds the letter first?

• Draw a keyboard and label spacebar and enter.

Assessment Questions

1. Where do we type letters?
2. What does the spacebar do?
3. What does the enter key do?
4. Type your name: which keys did you press?

Homework

• Draw a keyboard; circle the spacebar and enter key.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 5: The Mouse

Learning Objectives

• Hold the mouse correctly.

• Move the pointer on the screen.

• Click to open and select items.

Key Concepts

• The mouse moves the arrow called the pointer.

• Left click selects things.

• We hold the mouse gently in our right hand.

• Double click opens things quickly.

Teaching Methodology (Step by Step)

1. Demonstrate holding the mouse.
2. Show the pointer moving on screen.
3. Pupils take turns moving the pointer to targets.
4. Practise single click on icons.
5. Play a simple clicking game if available.

Classroom Activities

• Pointer target game on paper: trace the path.

• Draw a mouse and label its buttons.

Assessment Questions

1. What is the arrow on screen called?
2. Which click selects things?
3. How should we hold the mouse?
4. What does double click do?

Homework

• Practise drawing straight lines with a pencil as mouse practice.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 6: Taking Care of Computers

Learning Objectives

• Handle computers gently and carefully.

• Keep food and water away from computers.

• Follow lab rules in the computer room.

Key Concepts

• Computers break if we hit them.

• Water can damage the keyboard.

• Dust covers keep computers clean.

• We must shut down properly, not pull the plug.

Teaching Methodology (Step by Step)

1. Show the right and wrong way with role play.
2. Discuss: why no food near computers?
3. Make a lab rules chart together.
4. Demonstrate proper shutdown steps.
5. Pupils promise to follow lab rules.

Classroom Activities

• Lab rules poster for the computer room.

• Role play: good vs careless computer user.

Assessment Questions

1. Name two computer lab rules.
2. Why should we not eat near computers?
3. How should we shut down a computer?
4. What happens if water spills on a keyboard?

Homework

• Write five computer care rules in your notebook.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 7: Computers in Daily Life

Learning Objectives

• Give examples of computers around us.

• Understand machines like ATMs use computers.

• Tell how computers help our families.

Key Concepts

• ATMs give money using computers.

• Mobile phones are small computers.

• Washing machines and TVs have computer chips.

• Computers are everywhere today.

Teaching Methodology (Step by Step)

1. Brainstorm machines with computers inside.
2. Show pictures: ATM, phone, smart TV.
3. Pupils share computer use at home.
4. Discuss: life without computers.
5. Draw your favourite smart machine.

Classroom Activities

• Smart machines hunt: list five at home.

• Draw an ATM and label its parts.

Assessment Questions

1. Name two machines that have computers inside.
2. Is a mobile phone a computer?
3. How does an ATM help us?
4. Name one smart machine in your home.

Homework

• List five smart machines you see daily.

Time Allocation

3 periods of 35 minutes each.
