Lesson Planning

Complete Lesson Plan Book

Class: Class 4

Subject: Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Living and Non-living Things

DM

Unit 1: Living and Non-living Things

Learning Objectives

• Students will list the life processes that all living things share.

• Students will classify given objects as living or non-living with reasons.

• Students will explain why a seed is living but a stone is not.

• Students will give five examples each of living and non-living things from their surroundings.

Key Concepts

• Living things grow, move, eat, breathe, feel changes and make young ones like themselves.

• Non-living things do not grow, eat, breathe or reproduce on their own.

• Some non-living things were once parts of living things (like a wooden chair).

• Seeds and eggs are living because they can grow into new living things.

Teaching Methodology (Step by Step)

1. Hook: teacher shows a potted plant and a stone and asks which one is alive and how we know.
2. Teacher lists the seven signs of living things on the board with quick examples.
3. Picture sorting: students place picture cards under Living or Non-living columns and give a reason.
4. Think-pair-share: is a fallen leaf living or non-living? Students defend their answers.
5. Summary table: students copy the signs of living things and one example per sign.

Classroom Activities

• School-yard hunt: in pairs, students note 3 living and 3 non-living things they see outside.

• Mystery bag: pull objects from a bag and the class votes living or non-living with reasons.

• Seed demo: plant two beans, one gets water and light, one does not; observe for a week.

Assessment Questions

1. Name any three signs of living things.
2. Classify: sparrow, book, mango tree, fan — write L or N next to each and give one reason.
3. Why is a seed called a living thing even though it does not move?
4. Give two differences between living and non-living things.

Homework

• Make a two-column list of 6 living and 6 non-living things from your home.

• Draw a living thing and label two signs of life you can see in it.

Time Allocation

40 minutes
