Lesson Planning

Complete Lesson Plan Book

Class: Class 6

Subject: Mathematics

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Fractions: Adding Fractions with Different Denominators

DM

Unit 1: Fractions: Adding Fractions with Different Denominators

Learning Objectives

• Students will find a common denominator for two fractions with different denominators.

• Students will add fractions with unlike denominators and simplify the answer.

• Students will check whether an answer is reasonable by comparing it with 1.

Key Concepts

• Fractions with different denominators cannot be added directly; their pieces are different sizes.

• A common denominator is a number both denominators divide into, often their lowest common multiple.

• Equivalent fractions are made by multiplying the numerator and denominator by the same number.

• After adding, the answer should be simplified, for example 6/4 becomes 3/2 or 1 1/2.

Teaching Methodology (Step by Step)

1. Draw two bars, one cut into halves and one into quarters, and ask why the pieces cannot be added as they are.

2. Find the lowest common multiple of 2 and 4 together and rewrite 1/2 as 2/4.

3. Work out 1/2 + 1/4 step by step on the board and simplify the result.

4. Students solve four additions in pairs, starting with denominators 2 and 4 and moving to 3 and 6.

5. Students check one answer by drawing a bar model.

Classroom Activities

• Bar model race: pairs draw bar models for two additions against the clock.

• Common denominator hunt: students find the lowest common multiple for five pairs of denominators.

• Error hunt: students find and correct the wrong step in a worked addition.

Assessment Questions

1. Find the lowest common multiple of 3 and 4.

2. Work out 1/3 + 1/6 and simplify your answer.

3. Why can we not add 1/2 + 1/3 by adding the numerators and the denominators?

Homework

• Work out 2/5 + 1/10 and 1/4 + 2/8, simplifying each answer.

• Write a word problem that needs adding two fractions with different denominators, and solve it.

Time Allocation

40 minutes
