Lesson Planning

Complete Lesson Plan Book

Class: Class 1

Subject: Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: My Five Senses

DM

Unit 1: My Five Senses

Learning Objectives

• Students will name the five senses and the body part used for each.

• Students will match a sense to something it helps us learn about the world.

• Students will use at least three senses to describe one familiar object.

Key Concepts

• We see with our eyes, hear with our ears, smell with our nose, taste with our tongue and touch with our skin.

• Each sense gives us a different kind of information about the same thing.

• Some things can be learned by more than one sense, like an orange that we can see, smell, touch and taste.

• Our senses help keep us safe, for example smelling smoke or hearing a loud horn.

Teaching Methodology (Step by Step)

1. Point to each body part together and chant the sense that goes with it.
2. Hold up an apple and ask what we learn about it by looking, touching and smelling.
3. Play a short sound and ask the class to guess what made it, using only hearing.
4. Pass around a soft cloth and a rough stone so everyone feels the difference by touch.
5. Students draw themselves and label the five sense organs.

Classroom Activities

• Sense matching: picture cards of eyes, ears, nose, tongue and skin are matched to sense words.

• Mystery bag: without looking, students feel an object in a bag and describe it.

• Sense walk: the class lists one thing they can see, hear and smell from their seats.

Assessment Questions

1. Name the five senses.
2. Which sense do we use to hear a bell?
3. Look at a lemon. What can your eyes tell you, and what can your nose tell you?

Homework

• Draw five things at home, one for each sense, and write the sense under each picture.

• Ask a family member to close their eyes and guess a fruit by smell, then tell the class what happened.

Time Allocation

30 minutes
