Lesson Planning

Complete Lesson Plan Book

Class: Class 2

Subject: Mathematics

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Addition of Two-Digit Numbers Without Carrying

DM

Unit 1: Addition of Two-Digit Numbers Without Carrying

Learning Objectives

• Students will add two two-digit numbers without carrying correctly.

• Students will break a two-digit number into tens and ones before adding.

• Students will solve simple word problems using two-digit addition.

Key Concepts

• A two-digit number is made of tens and ones, for example 34 means 3 tens and 4 ones.

• To add two-digit numbers without carrying, add the ones first and then add the tens.

• Adding tens to tens is like counting in tens: 30 + 20 = 50.

• Adding ones to ones is a single-digit addition, for example 4 + 5 = 9.

• The sum of two two-digit numbers without carrying is found by joining the new tens and the new ones.

Teaching Methodology (Step by Step)

1. Write 34 + 25 on the board and ask students how many tens and ones are in each number.
2. Show that 34 means 3 tens and 4 ones, and 25 means 2 tens and 5 ones.
3. Add the ones first: 4 + 5 = 9, and write the 9 in the ones place.
4. Add the tens next: 3 tens + 2 tens = 5 tens, and write the 5 in the tens place.
5. Read the answer together: 59, and check it on a number line.
6. Give students three sums to solve on their own, then check the answers together.

Classroom Activities

• Number line jump: students use a number line to add two-digit numbers by jumping tens then ones.

• Tens and ones sorting: students break numbers like 34 and 25 into tens and ones, then add tens to tens and ones to ones.

• Pair race: in pairs, students solve five two-digit additions and check each other's answers.

Assessment Questions

1. Add 42 + 35. Show the tens and ones separately.
2. Add 61 + 27. Is the answer more than 80? Explain how you know.
3. Sara has 23 pencils and Ali gives her 14 more. How many pencils does Sara have now?

Homework

• Solve the ten two-digit addition sums given in the textbook exercise.

• Write three of your own two-digit addition sums without carrying and solve them.

Time Allocation

40 minutes
