Lesson Planning

Complete Lesson Plan Book

Class: Class 2

Subject: Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Animals and Their Homes

DM

Unit 1: Animals and Their Homes

Learning Objectives

• Students will name four common animals and the place where each one lives.

• Students will explain in simple words why an animal's home keeps it safe.

• Students will match at least six animals to their correct homes.

Key Concepts

• A home is the place where an animal lives, eats and stays safe.

• A dog often lives in a kennel, a bird lives in a nest, a fish lives in water and a rabbit lives in a burrow.

• Animals choose homes that suit their bodies: a fish needs water to breathe and a bird needs a high, safe nest.

• Wild animals and pet animals have different homes, but every home gives food, shelter and safety.

• We must not disturb an animal's home, because the animal and its babies depend on it.

Teaching Methodology (Step by Step)

1. Show pictures of a kennel, a nest, a pond and a burrow, and ask students which animal might live in each one.

2. Name one animal at a time and let the class call out its home, then write the pairs on the board.

3. Explain why each home suits its animal: water for the fish, a high nest for the bird, a burrow under the ground for the rabbit.

4. Read short clues aloud and let students guess the animal from its home.

5. End by asking students to draw their favourite animal inside its home and label both.

Classroom Activities

• Matching game: picture cards of animals are matched to picture cards of homes on the board.

• Home hunt: students look at a classroom poster and count how many animal homes they can find.

• Draw and label: each student draws one animal in its home and writes the animal's name and its home's name.

Assessment Questions

1. Where does a bird live? Draw a bird in its home.

2. Name the home of a dog and the home of a rabbit.

3. Why does a fish need to live in water? Answer in one sentence.

Homework

• Ask at home where a hen lives and draw the hen in its home.

• Write the names of three animals and their homes in your notebook.

Time Allocation
