Lesson Planning

Complete Lesson Plan Book

Class: Class 3

Subject: Mathematics

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Numbers up to 1000: Place Value

Unit 2: Addition with Carrying

Unit 3: Subtraction with Borrowing

Unit 4: Multiplication Tables 2 to 5

Unit 5: Introduction to Division

Unit 6: Fractions: Half and Quarter

Unit 7: Shapes and Measuring Length

DM

Unit 1: Numbers up to 1000: Place Value

Learning Objectives

• Read and write numbers up to 1000.

• Identify the place value of each digit: hundreds, tens, ones.

• Write numbers in expanded form.

Key Concepts

• Place value tells what a digit is worth.

• In 345, 3 means 3 hundreds.

• Expanded form: 345 = 300 + 40 + 5.

• Zero holds the place: 402 has 0 tens.

Teaching Methodology (Step by Step)

1. Show number cards; pupils read them aloud.
2. Use a place-value chart with hundreds, tens, ones columns.
3. Build numbers with base-ten blocks or sticks.
4. Pupils write numbers in expanded form on the board.
5. Quick quiz: teacher says a number, pupils show its place values.

Classroom Activities

• Place-value bingo with number cards.

• Build the biggest and smallest 3-digit numbers from digit cards.

Assessment Questions

1. What is the place value of 7 in 476?
2. Write 586 in expanded form.
3. Which is greater: 709 or 790?
4. Write the number: five hundred twenty-three.

Homework

• Write ten 3-digit numbers and circle the tens digit in each.

Time Allocation

4 periods of 35 minutes each.

Unit 2: Addition with Carrying

Learning Objectives

• Add 2-digit and 3-digit numbers with carrying.

• Line up digits correctly by place value.

• Check answers by adding in a different order.

Key Concepts

• Add ones first, then tens, then hundreds.

• When ones make 10 or more, carry to tens.

• Carrying means moving ten to the next column.

• Estimation helps check if the answer is sensible.

Teaching Methodology (Step by Step)

1. Revise adding without carrying first.
2. Demonstrate carrying with sticks bundled in tens.
3. Work two examples slowly on the board.
4. Pupils solve sums on the board with teacher help.
5. Independent practice with a short worksheet.

Classroom Activities

• Addition relay: teams solve sums on the board in turns.

• Shopping game: add prices of two items.

Assessment Questions

1. Solve: 47 + 35.
2. Solve: 268 + 145.
3. What do we carry when ones add to 14?

Homework

• Solve ten addition sums with carrying from the textbook exercise.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 3: Subtraction with Borrowing

Learning Objectives

• Subtract 2-digit and 3-digit numbers with borrowing.

• Borrow correctly when the top digit is smaller.

• Solve simple word problems using subtraction.

Key Concepts

• Subtract ones first, then tens, then hundreds.

• Borrowing means taking ten from the next column.

• We borrow when the top digit is smaller than the bottom one.

• Check subtraction by adding the answer back.

Teaching Methodology (Step by Step)

1. Revise subtraction without borrowing.
2. Demonstrate borrowing with bundles of sticks.
3. Solve two examples step by step on the board.
4. Pupils practise on slates while teacher checks.
5. Introduce a word problem and solve it together.

Classroom Activities

• Subtraction bowling: solve to knock down pins.

• Shopkeeper game: give back change using subtraction.

Assessment Questions

1. Solve: 63 - 28.
2. Solve: 405 - 176.
3. When do we need to borrow?

Homework

• Solve ten subtraction sums with borrowing from the exercise.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 4: Multiplication Tables 2 to 5

Learning Objectives

• Recite multiplication tables of 2, 3, 4 and 5.

• Understand multiplication as repeated addition.

• Solve simple multiplication sums and word problems.

Key Concepts

• Multiplication is repeated addition: 3 x 4 = 4+4+4.

• The x sign means groups of.

• Any number times 0 is 0; times 1 is itself.

• Tables help us multiply quickly.

Teaching Methodology (Step by Step)

1. Show groups of objects: 3 groups of 4 buttons.
2. Connect repeated addition to the x sign.
3. Chant tables together with clapping rhythm.
4. Pupils write tables in notebooks.
5. Daily 5-minute rapid table quiz.

Classroom Activities

• Table songs: sing tables with actions.

• Multiplication hopscotch on the floor grid.

Assessment Questions

1. What is 4 x 3?
2. Write 5 + 5 + 5 as a multiplication.
3. How many wheels do 5 bicycles have?
4. Recite the table of 4.

Homework

• Learn the tables of 2 to 5 by heart; write each twice.

Time Allocation

5 periods of 35 minutes each.

DM

Unit 5: Introduction to Division

Learning Objectives

• Share objects equally into groups.

• Understand division as equal sharing.

• Solve simple division sums with pictures.

Key Concepts

• Division means sharing equally.

• 12 shared among 3 friends = 4 each.

• The division sign looks like divided by.

• Division is the opposite of multiplication.

Teaching Methodology (Step by Step)

1. Share 12 pencils among 3 pupils practically.
2. Draw circles and share dots equally.
3. Introduce the division sign and simple sums.
4. Link division to known tables: 15 / 3 = 5.
5. Pupils solve picture-based division sums.

Classroom Activities

• Sharing biscuits equally among group members.

• Division card game: match sum with answer.

Assessment Questions

1. Share 10 toffees equally between 2 friends. How many each?
2. What is 12 divided by 4?
3. Draw 8 stars shared into 2 equal groups.
4. If 3 x 4 = 12, what is 12 / 3?

Homework

• Draw and solve five equal-sharing division sums.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 6: Fractions: Half and Quarter

Learning Objectives

• Identify half and quarter of shapes and objects.

• Shade halves and quarters of given figures.

• Name fractions in daily life: half apple, quarter hour.

Key Concepts

• A fraction is a part of a whole.

• Half means 2 equal parts; quarter means 4 equal parts.

• Parts must be equal to be halves or quarters.

• We write half as 1/2 and quarter as 1/4.

Teaching Methodology (Step by Step)

1. Fold paper circles into halves and quarters.
2. Show real objects: half apple, quarter of a roti.
3. Pupils shade halves and quarters on worksheets.
4. Compare: which is bigger, half or quarter?
5. Find halves and quarters in the classroom.

Classroom Activities

• Paper folding art: make halves and quarters.

• Fraction pizza: divide paper pizzas among friends.

Assessment Questions

1. Shade half of a circle.
2. How many quarters make a whole?
3. Is half bigger or smaller than a quarter?
4. Name one thing you share in halves at home.

Homework

• Draw three shapes; shade half of one and a quarter of another.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 7: Shapes and Measuring Length

Learning Objectives

• Identify basic 2D shapes: square, rectangle, triangle, circle.

• Count sides and corners of shapes.

• Measure short lengths in centimetres with a ruler.

Key Concepts

• A square has 4 equal sides and 4 corners.

• A triangle has 3 sides and 3 corners.

• A circle has no sides and no corners.

• We measure length in centimetres with a ruler.

Teaching Methodology (Step by Step)

1. Show shape cut-outs; pupils name and describe them.
2. Count sides and corners together by touching.
3. Demonstrate measuring a pencil with a ruler.
4. Pupils measure classroom objects in pairs.
5. Sort shapes by number of sides.

Classroom Activities

• Shape hunt: find shapes around the school.

• Measure and record lengths of five objects.

Assessment Questions

1. How many sides does a triangle have?
2. Name a shape with 4 equal sides.
3. Measure this pencil in centimetres.
4. Which is longer: your book or your pencil?

Homework

• Draw one square, one triangle and one circle; label their sides.

Time Allocation

3 periods of 35 minutes each.

DM
