Lesson Planning

Complete Lesson Plan Book

Class: Class 3

Subject: Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Living and Non-Living Things

Unit 2: Parts of a Plant

Unit 3: Animals and Their Homes

Unit 4: Water: Uses and Saving

Unit 5: Air Around Us

Unit 6: Our Five Senses

Unit 7: Weather and Seasons

DM

Unit 1: Living and Non-Living Things

Learning Objectives

• Distinguish between living and non-living things.

• Name three needs of living things.

• Sort objects into living and non-living groups.

Key Concepts

• Living things need air, water and food.

• Living things grow and move.

• Non-living things do not grow or need food.

• Plants and animals are living; stones and chairs are not.

Teaching Methodology (Step by Step)

1. Show pictures; pupils say living or non-living.
2. Discuss the needs of a plant with a real plant.
3. Observe a pet or picture of an animal.
4. Pupils sort object cards into two groups.
5. Go outside: find five living and five non-living things.

Classroom Activities

• Nature walk: list living things in the school ground.

• Draw a living thing and a non-living thing.

Assessment Questions

1. Name three living things.
2. Do non-living things need water?
3. Name two needs of living things.
4. Is a car living or non-living? Why?

Homework

• Find five living things at home and write their needs.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 2: Parts of a Plant

Learning Objectives

• Name the parts of a plant: root, stem, leaf, flower.

• Tell the function of each part simply.

• Label a plant diagram correctly.

Key Concepts

• Roots hold the plant and take water from soil.

• The stem carries water to leaves.

• Leaves make food for the plant.

• Flowers become fruits with seeds.

Teaching Methodology (Step by Step)

1. Show a real plant; point to each part.
2. Pull a small weed to show roots.
3. Pupils label a large plant diagram.
4. Discuss: what happens if roots are cut?
5. Grow beans in cups and observe daily.

Classroom Activities

• Bean growing experiment in transparent cups.

• Leaf printing art with real leaves.

Assessment Questions

1. Name the four parts of a plant.
2. What do roots do?
3. Which part makes food?
4. What do flowers become?

Homework

• Draw a plant, label its parts and write one function of each.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 3: Animals and Their Homes

Learning Objectives

• Name common animals and their homes.

• Tell what different animals eat.

• Match animals with their homes.

Key Concepts

• A lion lives in a den; a bird in a nest.

• A fish lives in water; a rabbit in a burrow.

• Animals eat plants, other animals, or both.

• Homes keep animals safe.

Teaching Methodology (Step by Step)

1. Show animal picture cards with homes.
2. Pupils match animals to homes on the board.
3. Discuss what pets need: food, water, shelter.
4. Tell a short story about an animal's home.
5. Sing an animal song together.

Classroom Activities

• Build animal homes with clay or paper.

• Visit or picture-tour: animals in the neighbourhood.

Assessment Questions

1. Where does a bird live?
2. Name the home of a lion.
3. What does a rabbit eat?
4. Name two animals that live in water.

Homework

• Draw three animals with their homes and label them.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 4: Water: Uses and Saving

Learning Objectives

- Name five uses of water.
- Tell where water comes from.
- Practise ways to save water.

Key Concepts

- We drink water to stay alive.
- Water is used for cooking, washing and farming.
- Rain, rivers and wells give us water.
- Saving water is everyone's duty.

Teaching Methodology (Step by Step)

1. Discuss: what do we use water for daily?
2. Show the water cycle in very simple words.
3. Demonstrate a leaking tap; measure wasted water.
4. Brainstorm ways to save water at home.
5. Pupils promise one water-saving action.

Classroom Activities

- Water patrol: find leaking taps in school.
- Poster: save every drop of water.

Assessment Questions

1. Name three uses of water.
2. Where does rainwater go?
3. Name two ways to save water.
4. Why should we not waste water?

Homework

- Practise one water-saving habit for a week and report.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 5: Air Around Us

Learning Objectives

• Prove that air is everywhere with simple experiments.

• Name two uses of air.

• Tell why clean air is important.

Key Concepts

• Air is all around us, though we cannot see it.

• We need air to breathe.

• Wind is moving air.

• Plants need air to make food.

Teaching Methodology (Step by Step)

1. Fan a paper: feel the moving air.
2. Trap air in a polythene bag.
3. Blow through a straw into water: see bubbles.
4. Discuss: what pollutes air?
5. Pupils list things that need air.

Classroom Activities

• Windmill making with paper.

• Balloon race: whose balloon flies farthest?

Assessment Questions

1. Can you see air?
2. Name two things that need air.
3. What is wind?
4. How can we keep air clean?

Homework

• Do the bag experiment at home and tell your family.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 6: Our Five Senses

Learning Objectives

• Name the five senses and their organs.

• Match each sense with what it does.

• Use senses to describe objects.

Key Concepts

• Eyes see, ears hear, nose smells.

• Tongue tastes, skin feels.

• Senses help us learn about the world.

• We must take care of our sense organs.

Teaching Methodology (Step by Step)

1. Blindfold game: identify objects by touch.
2. Smell jars: guess the smell.
3. Taste test: sweet, salty, sour.
4. Listening walk: name sounds heard.
5. Discuss caring for eyes and ears.

Classroom Activities

• Sense stations: rotate through five sense activities.

• Draw and label the five sense organs.

Assessment Questions

1. Name the five senses.
2. Which organ helps us smell?
3. What does the skin feel?
4. Name one way to care for your eyes.

Homework

• Describe an apple using all five senses.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 7: Weather and Seasons

Learning Objectives

- Name different kinds of weather.
- Name the four seasons and their features.
- Dress and eat correctly for each season.

Key Concepts

- Weather can be sunny, cloudy, rainy or windy.
- Summer is hot; winter is cold.
- Spring has flowers; autumn leaves fall.
- We wear warm clothes in winter.

Teaching Methodology (Step by Step)

1. Look outside: describe today's weather.
2. Show season pictures; pupils name each.
3. Discuss clothes and food for each season.
4. Make a weather chart for one week.
5. Sing a seasons song.

Classroom Activities

- Weather wheel: spin and describe the weather.
- Dress-up relay for different seasons.

Assessment Questions

1. Name four kinds of weather.
2. Which season is the coldest?
3. What do we wear in winter?
4. Name one fruit of summer.

Homework

- Record the weather for five days in your notebook.

Time Allocation

3 periods of 35 minutes each.
