Lesson Planning

Complete Lesson Plan Book

Class: Class 4

Subject: Mathematics

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Numbers up to 10,000

Unit 2: Multiplication Tables 6 to 10

Unit 3: Multiplication by 2-Digit Numbers

Unit 4: Division with Remainders

Unit 5: Fractions: Comparing

Unit 6: Lines and Angles

Unit 7: Measuring Weight, Capacity and Time

DM

Unit 1: Numbers up to 10,000

Learning Objectives

• Read and write numbers up to 10,000.

• Identify place values: thousands to ones.

• Compare and order 4-digit numbers.

Key Concepts

• The thousands place is left of hundreds.

• In 4,562, 4 means 4 thousand.

• Expanded form: 4,562 = 4,000 + 500 + 60 + 2.

• Greater digits on the left mean greater numbers.

Teaching Methodology (Step by Step)

1. Revise 3-digit place value quickly.
2. Introduce the thousands column with blocks.
3. Pupils read 4-digit numbers aloud.
4. Compare numbers using greater/smaller signs.
5. Order numbers from smallest to largest.

Classroom Activities

• Number building with digit cards.

• Greater-or-smaller card battle in pairs.

Assessment Questions

1. What is the place value of 5 in 5,234?
2. Write 7,081 in expanded form.
3. Which is greater: 6,789 or 6,879?
4. Arrange: 3,456, 3,654, 3,465 in order.

Homework

• Write ten 4-digit numbers; circle the thousands digit.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 2: Multiplication Tables 6 to 10

Learning Objectives

• Recite tables of 6, 7, 8, 9 and 10.

• Use tables to solve multiplication sums.

• Apply tables in word problems.

Key Concepts

• Table of 10 is easy: add a zero.

• Table of 9 has a finger trick.

• Tables 6 to 8 need regular practice.

• Knowing tables makes maths fast.

Teaching Methodology (Step by Step)

1. Revise tables 2 to 5 quickly.
2. Introduce table of 10 first for confidence.
3. Chant new tables with rhythm daily.
4. Show the 9-times finger trick.
5. Rapid-fire quiz every day.

Classroom Activities

• Table tennis quiz: teams compete.

• Make a personal table booklet.

Assessment Questions

1. Recite the table of 7.
2. What is 8 x 6?
3. What is 9 x 9?
4. A box has 8 pencils. How many in 7 boxes?

Homework

• Learn tables 6 to 10 by heart; write each twice.

Time Allocation

5 periods of 35 minutes each.

DM

Unit 3: Multiplication by 2-Digit Numbers

Learning Objectives

• Multiply 2-digit numbers by 2-digit numbers.

• Follow the steps of long multiplication.

• Check answers by estimation.

Key Concepts

• Multiply by ones first, then by tens.

• Add a zero placeholder in the second row.

• Add both rows to get the answer.

• Estimate first: 23 x 19 is about 20 x 20.

Teaching Methodology (Step by Step)

1. Revise multiplying by 10 and 20.
2. Demonstrate long multiplication slowly.
3. Pupils copy steps into notebooks.
4. Guided practice on the board.
5. Independent worksheet practice.

Classroom Activities

• Long multiplication relay on the board.

• Estimate-then-solve challenge.

Assessment Questions

1. Solve: 23 x 14.
2. Solve: 45 x 32.
3. Why do we add zero in the second row?
4. Estimate: 28 x 31.

Homework

• Solve ten 2-digit multiplications from the exercise.

Time Allocation

5 periods of 35 minutes each.

DM

Unit 4: Division with Remainders

Learning Objectives

• Divide 2-digit numbers by 1-digit numbers.

• Find quotients and remainders.

• Check division with multiplication.

Key Concepts

• Division splits into equal groups.

• The remainder is what is left over.

• Remainder must be smaller than the divisor.

• Check: divisor x quotient + remainder = dividend.

Teaching Methodology (Step by Step)

1. Revise division without remainder.
2. Share objects leaving some over.
3. Demonstrate long division steps.
4. Pupils practise on slates.
5. Check answers using multiplication.

Classroom Activities

• Sharing sweets with leftovers game.

• Division bingo with remainders.

Assessment Questions

1. Divide: 25 / 4. Give quotient and remainder.
2. Divide: 47 / 5.
3. Can the remainder be bigger than the divisor?
4. Check: is 37 / 6 = 6 remainder 1 correct?

Homework

• Solve ten division sums with remainders.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 5: Fractions: Comparing

Learning Objectives

• Compare fractions with same denominators.

• Identify equivalent fractions simply.

• Order fractions from smallest to largest.

Key Concepts

• Same denominator: bigger numerator means bigger fraction.

• 1/2 = 2/4: these are equivalent.

• We compare using pictures first.

• Fractions live between 0 and 1.

Teaching Methodology (Step by Step)

1. Revise halves and quarters.
2. Shade fractions and compare visually.
3. Fold papers to show equivalents.
4. Number line walk for fractions.
5. Order fraction cards.

Classroom Activities

• Fraction war card game.

• Equivalent fraction matching pairs.

Assessment Questions

1. Which is bigger: 3/5 or 4/5?
2. Are 1/2 and 2/4 equal?
3. Order: 1/4, 3/4, 2/4.
4. Shade 3/4 of a rectangle.

Homework

• Draw and shade five pairs of fractions; circle the bigger.

Time Allocation

4 periods of 35 minutes each.

DM

Unit 6: Lines and Angles

Learning Objectives

• Identify line, line segment and ray.

• Recognise right, acute and obtuse angles.

• Draw angles and label them.

Key Concepts

• A line goes on forever both ways.

• A line segment has two endpoints.

• A right angle is like the corner of a book.

• Angles are measured in degrees.

Teaching Methodology (Step by Step)

1. Draw lines, segments and rays on the board.
2. Find right angles in the classroom.
3. Make angles with arms and straws.
4. Sort angle cards: right, acute, obtuse.
5. Draw and label three angles.

Classroom Activities

• Angle hunt around the school.

• Make angles with clock hands.

Assessment Questions

1. Draw a line segment.
2. What is the difference between a line and a ray?
3. Name an object with a right angle.
4. Is this angle acute or obtuse?

Homework

• Draw two of each: line, segment, ray; label angles.

Time Allocation

3 periods of 35 minutes each.

DM

Unit 7: Measuring Weight, Capacity and Time

Learning Objectives

• Measure weight in kilograms and grams.

• Measure capacity in litres.

• Read time and solve time problems.

Key Concepts

• We weigh things in kg and g.

• We measure liquids in litres.

• A clock has hours, minutes, seconds.

• 60 minutes make one hour.

Teaching Methodology (Step by Step)

1. Weigh classroom objects on a scale.
2. Compare: which is heavier?
3. Pour water into litre bottles.
4. Read clock times together.
5. Solve: how long between 3:00 and 4:30?

Classroom Activities

• Shop role play: weigh and price items.

• Make a class timetable with times.

Assessment Questions

1. Which is heavier: 1 kg or 500 g?
2. How many litres in 2 bottles of 1 litre?
3. What time is it: hour hand on 4, minute on 12?
4. How many minutes in 2 hours?

Homework

• Weigh five kitchen items; record in grams.

Time Allocation

4 periods of 35 minutes each.

DM
