Lesson Planning

Complete Lesson Plan Book

Class: Class 5

Subject: Computer Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Parts of a Computer

Unit 2: Input Devices

Unit 3: Output Devices

Unit 4: The Keyboard and the Mouse

Unit 5: MS Paint: Drawing Basics

Unit 6: MS Word: Typing Basics

Unit 7: Files and Folders

Unit 8: Using a Computer Safely

DM

Unit 1: Parts of a Computer

Learning Objectives

• Students will be able to name the main parts of a computer.

• Students will be able to identify CPU, monitor, keyboard and mouse.

• Students will be able to state the use of each main part.

Key Concepts

• CPU: the brain of the computer.

• Monitor: shows output on screen.

• Keyboard and mouse: input devices.

• System unit holds the CPU and memory.

Teaching Methodology (Step by Step)

1. Begin with a 5-minute warm-up: ask 2-3 oral questions revising the previous lesson and linking it to Parts of a Computer.

2. Present the key ideas of Parts of a Computer on the board with one clear example or a labelled diagram.

3. Explain each point slowly in simple words, asking a short check-question after every point.

4. Do guided practice: solve 3-4 examples of Parts of a Computer together, inviting students to complete steps on the board.

5. Close with a 5-minute oral recap in which students state one new thing they learned about Parts of a Computer.

Classroom Activities

• Part hunt: students point to and name parts on a real computer.

• Label it: students label parts on a computer diagram.

Assessment Questions

1. Name the four main parts of a computer.

2. Which part is called the brain of the computer?

3. What is the use of the monitor?

Homework

• Draw a computer and label its four main parts.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 2: Input Devices

Learning Objectives

• Students will be able to define an input device.

• Students will be able to name four input devices.

• Students will be able to state the use of each input device.

Key Concepts

• Input device: sends data into the computer.

• Keyboard: types letters and numbers.

• Mouse: points and clicks; scanner: copies pictures.

• Microphone: records sound.

Teaching Methodology (Step by Step)

1. Start with rapid-fire mental revision: 5 quick questions from the last lesson connected to Input Devices.

2. Demonstrate Input Devices step by step on the board while students watch, listen and copy.

3. Move to guided practice: students attempt 2-3 similar items with the teacher's support.

4. Give independent practice: a short written task on Input Devices completed individually in notebooks.

5. Check a few notebooks on the spot, correct common mistakes on the board and summarise Input Devices.

Classroom Activities

• Device show: students demonstrate one input device each.

• Input sort: sort picture cards into input and non-input devices.

Assessment Questions

1. What is an input device?

2. Name four input devices.

3. What is the use of a scanner?

Homework

• List 3 input devices at home or school and their uses.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.

Unit 3: Output Devices

Learning Objectives

• Students will be able to define an output device.

• Students will be able to name four output devices.

• Students will be able to match devices with their output.

Key Concepts

• Output device: shows result from the computer.

• Monitor: shows text and pictures.

• Printer: prints on paper; speaker: gives sound.

• Projector: shows big image on wall.

Teaching Methodology (Step by Step)

1. Open with a hook: a short story, riddle or real-life example that introduces Output Devices.

2. Lead a class discussion on Output Devices with 4-5 guiding questions; record key answers on the board.

3. Organise the main activity in pairs or small groups according to the plan for Output Devices.

4. Let groups share their work; add corrections and the important points of Output Devices.

5. Finish with a quick oral or written check on Output Devices and announce the homework.

Classroom Activities

• Output match: match device cards with output cards.

• Sound test: students hear speaker output and name the device.

Assessment Questions

1. What is an output device?

2. Name four output devices.

3. Which device prints on paper?

Homework

• Draw any three output devices and write one use of each.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 4: The Keyboard and the Mouse

Learning Objectives

• Students will be able to identify letter, number and special keys.

• Students will be able to hold the mouse and perform click and double-click.

• Students will be able to type their name using the keyboard.

Key Concepts

• Keyboard: letter keys, number keys, spacebar, enter key.

• Mouse: left click selects, right click opens menu.

• Double-click opens a file or program.

• Correct hand position on keyboard.

Teaching Methodology (Step by Step)

1. Begin with 5 minutes of silent or loud reading connected to The Keyboard and the Mouse.

2. Explain the new words and key ideas of The Keyboard and the Mouse; write difficult words with meanings on the board.

3. Read the passage or examples of The Keyboard and the Mouse together, with students taking turns.

4. Students complete a short written exercise on The Keyboard and the Mouse in their notebooks.

5. Review the answers together, praise good work and give a brief summary of The Keyboard and the Mouse.

Classroom Activities

• Typing race: students type their names correctly and quickly.

• Click practice: students open a folder with double-click.

Assessment Questions

1. Name three special keys of the keyboard.

2. What does double-click do?

3. Which mouse button is used for selecting?

Homework

• Practise typing 5 lines about yourself on the computer.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.

Unit 5: MS Paint: Drawing Basics

Learning Objectives

• Students will be able to open MS Paint.

• Students will be able to use pencil, brush and shapes tools.

• Students will be able to save their drawing.

Key Concepts

• Opening Paint from the Start menu.

• Tools: pencil, brush, line, rectangle, circle.

• Colours: fill and outline colours.

• Saving: File > Save with a name.

Teaching Methodology (Step by Step)

1. Begin with a 5-minute warm-up: ask 2-3 oral questions revising the previous lesson and linking it to MS Paint: Drawing Basics.

2. Present the key ideas of MS Paint: Drawing Basics on the board with one clear example or a labelled diagram.

3. Explain each point slowly in simple words, asking a short check-question after every point.

4. Do guided practice: solve 3-4 examples of MS Paint: Drawing Basics together, inviting students to complete steps on the board.

5. Close with a 5-minute oral recap in which students state one new thing they learned about MS Paint: Drawing Basics.

Classroom Activities

• Draw and save: students draw a house and save it with their name.

• Shape art: students make a picture using only shapes.

Assessment Questions

1. How do you open MS Paint?

2. Name three tools of MS Paint.

3. How do you save a drawing?

Homework

• Draw your school in Paint and save it.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 6: MS Word: Typing Basics

Learning Objectives

• Students will be able to open MS Word and type text.

• Students will be able to use backspace and enter keys.

• Students will be able to save a Word document.

Key Concepts

• Opening Word; the blank page and cursor.

• Typing: letters appear where the cursor blinks.

• Enter: new line; backspace: delete left letter.

• Saving the document with a name.

Teaching Methodology (Step by Step)

1. Start with rapid-fire mental revision: 5 quick questions from the last lesson connected to MS Word: Typing Basics.

2. Demonstrate MS Word: Typing Basics step by step on the board while students watch, listen and copy.

3. Move to guided practice: students attempt 2-3 similar items with the teacher's support.

4. Give independent practice: a short written task on MS Word: Typing Basics completed individually in notebooks.

5. Check a few notebooks on the spot, correct common mistakes on the board and summarise MS Word: Typing Basics.

Classroom Activities

• Type and save: students type 5 lines about their family and save.

• Fix it: students correct a text with 5 spelling mistakes.

Assessment Questions

1. How do you start a new line in Word?

2. What does the backspace key do?

3. How do you save a Word file?

Homework

• Type your daily routine in Word and save the file.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.

Unit 7: Files and Folders

Learning Objectives

• Students will be able to explain what a file and folder are.

• Students will be able to create a new folder.

• Students will be able to save a file inside a folder.

Key Concepts

• File: stores work like a document or picture.

• Folder: holds many files like a bag.

• Creating a folder: right-click > New > Folder.

• Naming files clearly to find them later.

Teaching Methodology (Step by Step)

1. Open with a hook: a short story, riddle or real-life example that introduces Files and Folders.

2. Lead a class discussion on Files and Folders with 4-5 guiding questions; record key answers on the board.

3. Organise the main activity in pairs or small groups according to the plan for Files and Folders.

4. Let groups share their work; add corrections and the important points of Files and Folders.

5. Finish with a quick oral or written check on Files and Folders and announce the homework.

Classroom Activities

• My folder: each student creates a folder with their name.

• Sort it: students move 5 files into the right folders.

Assessment Questions

1. What is the difference between a file and a folder?

2. How do you create a new folder?

3. Why should we name files clearly?

Homework

• Create a folder with your name and save 2 files in it.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 8: Using a Computer Safely

Learning Objectives

• Students will be able to list three computer safety rules.

• Students will be able to sit in the correct posture.

• Students will be able to explain why passwords are private.

Key Concepts

• Sit straight; screen at eye level.

• Wash hands before use; no food near keyboard.

• Ask permission before opening new programs.

• Passwords are secret; never share them.

Teaching Methodology (Step by Step)

1. Begin with 5 minutes of silent or loud reading connected to Using a Computer Safely.

2. Explain the new words and key ideas of Using a Computer Safely; write difficult words with meanings on the board.

3. Read the passage or examples of Using a Computer Safely together, with students taking turns.

4. Students complete a short written exercise on Using a Computer Safely in their notebooks.

5. Review the answers together, praise good work and give a brief summary of Using a Computer Safely.

Classroom Activities

• Safety poster: groups make a poster of 5 computer safety rules.

• Posture check: partners check each other's sitting posture.

Assessment Questions

1. Name three safety rules for using a computer.

2. Why should we not eat near the keyboard?

3. Should you share your password? Why?

Homework

• Write 5 computer safety rules on a chart.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.
