Lesson Planning

Complete Lesson Plan Book

Class: Class 6

Subject: Computer Science

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Computer Memory and Storage

Unit 2: Software: System and Application

Unit 3: MS Word: Text Formatting

Unit 4: MS PowerPoint: First Slides

Unit 5: The Internet and Email

Unit 6: Algorithms: Steps to Solve Problems

Unit 7: Data and Information

Unit 8: Staying Safe Online

DM

Unit 1: Computer Memory and Storage

Learning Objectives

• Students will be able to explain the difference between memory and storage.

• Students will be able to name RAM and ROM.

• Students will be able to name three storage devices.

Key Concepts

• Memory: holds data while working; RAM is temporary.

• ROM: permanent instructions for starting up.

• Storage: hard disk, USB drive, memory card.

• Units: bit, byte, kilobyte, megabyte, gigabyte.

Teaching Methodology (Step by Step)

1. Begin with a 5-minute warm-up: ask 2-3 oral questions revising the previous lesson and linking it to Computer Memory and Storage.

2. Present the key ideas of Computer Memory and Storage on the board with one clear example or a labelled diagram.

3. Explain each point slowly in simple words, asking a short check-question after every point.

4. Do guided practice: solve 3-4 examples of Computer Memory and Storage together, inviting students to complete steps on the board.

5. Close with a 5-minute oral recap in which students state one new thing they learned about Computer Memory and Storage.

Classroom Activities

• Memory match: match terms with their definitions on cards.

• Size order: arrange storage units from smallest to largest.

Assessment Questions

1. What is the difference between RAM and ROM?

2. Name three storage devices.

3. Which is bigger: a megabyte or a gigabyte?

Homework

• Draw and label three storage devices with one use each.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 2: Software: System and Application

Learning Objectives

• Students will be able to define software.

• Students will be able to explain system software with an example.

• Students will be able to name four application programs.

Key Concepts

• Software: programs that run the computer.

• System software: Windows manages the computer.

• Application software: Word, Paint, browsers do tasks.

• Hardware needs software to work.

Teaching Methodology (Step by Step)

1. Start with rapid-fire mental revision: 5 quick questions from the last lesson connected to Software: System and Application.

2. Demonstrate Software: System and Application step by step on the board while students watch, listen and copy.

3. Move to guided practice: students attempt 2-3 similar items with the teacher's support.

4. Give independent practice: a short written task on Software: System and Application completed individually in notebooks.

5. Check a few notebooks on the spot, correct common mistakes on the board and summarise Software: System and Application.

Classroom Activities

• Software sort: sort 10 program names into system and application.

• My apps: students list 5 apps they use and their purposes.

Assessment Questions

1. What is software?

2. Give one example of system software.

3. Name four application programs.

Homework

• List 5 application programs with one use of each.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.

Unit 3: MS Word: Text Formatting

Learning Objectives

• Students will be able to make text bold, italic and underlined.

• Students will be able to change font size and colour.

• Students will be able to align text left, centre and right.

Key Concepts

• Bold (B), italic (I), underline (U) buttons.

• Font size and colour from the toolbar.

• Alignment: left, centre, right, justify.

• Formatting makes documents attractive.

Teaching Methodology (Step by Step)

1. Open with a hook: a short story, riddle or real-life example that introduces MS Word: Text Formatting.

2. Lead a class discussion on MS Word: Text Formatting with 4-5 guiding questions; record key answers on the board.

3. Organise the main activity in pairs or small groups according to the plan for MS Word: Text Formatting.

4. Let groups share their work; add corrections and the important points of MS Word: Text Formatting.

5. Finish with a quick oral or written check on MS Word: Text Formatting and announce the homework.

Classroom Activities

• Format race: students format a given paragraph in 5 minutes.

• Style show: each student styles one heading differently.

Assessment Questions

1. How do you make text bold in Word?

2. How do you centre a heading?

3. Name three things you can change from the font toolbar.

Homework

• Type and format a 10-line paragraph with a coloured heading.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 4: MS PowerPoint: First Slides

Learning Objectives

• Students will be able to open PowerPoint and add a new slide.

• Students will be able to add a title and text to a slide.

• Students will be able to run a slide show.

Key Concepts

• PowerPoint makes presentations with slides.

• Title slide and text slides.

• Adding text boxes and bullet points.

• Slide show: F5 starts from the beginning.

Teaching Methodology (Step by Step)

1. Begin with 5 minutes of silent or loud reading connected to MS PowerPoint: First Slides.

2. Explain the new words and key ideas of MS PowerPoint: First Slides; write difficult words with meanings on the board.

3. Read the passage or examples of MS PowerPoint: First Slides together, with students taking turns.

4. Students complete a short written exercise on MS PowerPoint: First Slides in their notebooks.

5. Review the answers together, praise good work and give a brief summary of MS PowerPoint: First Slides.

Classroom Activities

• My slides: students make a 3-slide presentation about themselves.

• Show time: students present their slides to the class.

Assessment Questions

1. How do you add a new slide?

2. How do you start a slide show?

3. What is a title slide?

Homework

• Make a 4-slide presentation on your favourite animal.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.

Unit 5: The Internet and Email

Learning Objectives

• Students will be able to explain what the internet is.

• Students will be able to name two uses of the internet.

• Students will be able to explain the parts of an email address.

Key Concepts

• Internet: worldwide network of computers.

• Uses: learning, communication, news, shopping.

• Email: fast electronic messages.

• Email address: name, @ sign, domain.

Teaching Methodology (Step by Step)

1. Begin with a 5-minute warm-up: ask 2-3 oral questions revising the previous lesson and linking it to The Internet and Email.

2. Present the key ideas of The Internet and Email on the board with one clear example or a labelled diagram.

3. Explain each point slowly in simple words, asking a short check-question after every point.

4. Do guided practice: solve 3-4 examples of The Internet and Email together, inviting students to complete steps on the board.

5. Close with a 5-minute oral recap in which students state one new thing they learned about The Internet and Email.

Classroom Activities

• Address parts: students label parts of 5 email addresses.

• Safe search: teacher shows how to search for a topic safely.

Assessment Questions

1. What is the internet?

2. Name two uses of the internet.

3. What are the parts of an email address?

Homework

• Write 5 lines on how the internet helps students.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 6: Algorithms: Steps to Solve Problems

Learning Objectives

• Students will be able to define an algorithm.

• Students will be able to write steps for a daily task.

• Students will be able to follow an algorithm in order.

Key Concepts

• Algorithm: step-by-step instructions to solve a problem.

• Steps must be clear and in order.

• Example: brushing teeth, making tea.

• Computers follow algorithms called programs.

Teaching Methodology (Step by Step)

1. Start with rapid-fire mental revision: 5 quick questions from the last lesson connected to Algorithms: Steps to Solve Problems.

2. Demonstrate Algorithms: Steps to Solve Problems step by step on the board while students watch, listen and copy.

3. Move to guided practice: students attempt 2-3 similar items with the teacher's support.

4. Give independent practice: a short written task on Algorithms: Steps to Solve Problems completed individually in notebooks.

5. Check a few notebooks on the spot, correct common mistakes on the board and summarise Algorithms: Steps to Solve Problems.

Classroom Activities

• Morning algorithm: students write steps of getting ready for school.

• Robot game: one student follows classmates' steps like a robot.

Assessment Questions

1. What is an algorithm?

2. Write the steps to draw a square.

3. Why must steps be in order?

Homework

• Write an algorithm for making a paper boat (6 steps).

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.

Unit 7: Data and Information

Learning Objectives

• Students will be able to explain the difference between data and information.

• Students will be able to give two examples of each.

• Students will be able to explain why information must be correct.

Key Concepts

• Data: raw facts and numbers.

• Information: data arranged to give meaning.

• Example: marks list is data; result card is information.

• Wrong data gives wrong information.

Teaching Methodology (Step by Step)

1. Open with a hook: a short story, riddle or real-life example that introduces Data and Information.

2. Lead a class discussion on Data and Information with 4-5 guiding questions; record key answers on the board.

3. Organise the main activity in pairs or small groups according to the plan for Data and Information.

4. Let groups share their work; add corrections and the important points of Data and Information.

5. Finish with a quick oral or written check on Data and Information and announce the homework.

Classroom Activities

• Data to info: students turn a marks list into a result summary.

• True or false: judge 5 statements as data or information.

Assessment Questions

1. What is the difference between data and information?

2. Give two examples of data and two of information.

3. Why must information be correct?

Homework

• Collect 10 data items about your class and make one information table.

Time Allocation

Two periods (80 minutes): 10 min warm-up and revision, 25 min concept presentation, 25 min guided and independent practice, 15 min activity and assessment, 5 min closure and homework.

Unit 8: Staying Safe Online

Learning Objectives

• Students will be able to list four online safety rules.

• Students will be able to explain why personal information is private.

• Students will be able to state what to do about a stranger online.

Key Concepts

• Never share name, address, school online.

• Strong passwords; never share them.

• Tell an elder about strange messages.

• Not everything online is true.

Teaching Methodology (Step by Step)

1. Begin with 5 minutes of silent or loud reading connected to Staying Safe Online.

2. Explain the new words and key ideas of Staying Safe Online; write difficult words with meanings on the board.

3. Read the passage or examples of Staying Safe Online together, with students taking turns.

4. Students complete a short written exercise on Staying Safe Online in their notebooks.

5. Review the answers together, praise good work and give a brief summary of Staying Safe Online.

Classroom Activities

• Safety pledge: class signs an online safety pledge chart.

• Spot the danger: students find 3 unsafe actions in a story.

Assessment Questions

1. Name four online safety rules.

2. Should you share your school name online? Why?

3. What should you do if a stranger messages you?

Homework

• Make an online safety poster for your classroom.

Time Allocation

Two periods (80 minutes): 10 min revision, 20 min explanation with examples, 30 min practice and class activity, 15 min oral and written check, 5 min homework briefing.
