Lesson Planning

Complete Lesson Plan Book

Class: Class 3

Subject: Mathematics

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Multiplication Tables: 2, 3 and 4 Times Tables

DM

Unit 1: Multiplication Tables: 2, 3 and 4 Times Tables

Learning Objectives

• Students will recite the 2, 3 and 4 times tables up to 10.

• Students will explain multiplication as repeated addition with equal groups.

• Students will use times tables to solve simple word problems.

Key Concepts

• Multiplication is repeated addition: 3 x 4 means 3 groups of 4, which is 4 + 4 + 4.

• The 2 times table counts in twos and always gives even numbers.

• The 3 times table counts in threes, and its answers follow a repeating ones pattern of 3, 6, 9, 2, 5, 8, 1, 4, 7, 0.

• The 4 times table can be found by doubling the 2 times table answers.

• Times tables help solve real problems quickly, such as finding the total cost of several equal groups.

Teaching Methodology (Step by Step)

1. Count in twos, threes and fours together as a class chant.
2. Show 3 groups of 4 counters and link the picture to 3 x 4 = 12.
3. Build the 2, 3 and 4 times tables on the board, pointing out the patterns in each.
4. Students practise the tables in pairs with quick-fire questions.
5. Students solve two shop word problems using the tables.

Classroom Activities

• Table race: pairs fill in the 2, 3 and 4 times tables against the clock.

• Pattern hunt: students find the pattern in the 3 times table answers.

• Shop game: students buy items in groups of 2, 3 and 4 and work out the total cost.

Assessment Questions

1. Write the 4 times table from 4 x 1 to 4 x 5.
2. What is 3 x 7?
3. A packet holds 4 pencils. How many pencils are in 6 packets?

Homework

• Write the 2, 3 and 4 times tables up to x 10.

• A tray holds 3 eggs. How many eggs are in 8 trays? Show your working.

Time Allocation

40 minutes
