Lesson Planning

Complete Lesson Plan Book

Class: I.Com · Class 11

Subject: Accounting

Medium: English

Academic Year 2026-27

This book is prepared as a teaching guide for teachers.

Table of Contents

Unit 1: Journal Entries: Recording Business Transactions

DM

Unit 1: Journal Entries: Recording Business Transactions

Learning Objectives

• Students will identify the accounts affected by a business transaction.

• Students will write correct journal entries with debit, credit and narration.

• Students will explain the dual aspect rule behind every journal entry.

Key Concepts

• A journal is the book of original entry where every business transaction is first recorded in date order.

• Every transaction affects at least two accounts: one account is debited and another is credited for the same amount.

• The debit side records what comes in or what is spent, and the credit side records what goes out or the source of the value.

• A journal entry has a date, the accounts debited and credited, amounts, and a short narration explaining the transaction.

• Common entries include cash purchases, credit purchases, sales, payments to creditors and receipts from debtors.

Teaching Methodology (Step by Step)

1. Ask what happens in a shop when goods are bought on credit, and list the two sides of the deal.
2. Explain the journal format and the rule that total debits must equal total credits.
3. Work out three entries together: cash purchase, credit purchase and cash received from a debtor.
4. Students write four entries in pairs and check each other's debit and credit sides.
5. Students post one entry into T-accounts to see where journal entries go next.

Classroom Activities

• Transaction hunt: students pick out business transactions from a mixed list of personal and business events.

• Journal relay: teams take turns writing the debit and credit for a transaction on the board.

• Ledger link: students post two journal entries into simple T-accounts.

Assessment Questions

1. A business buys goods for cash Rs 10,000. Write the journal entry.
2. Why is every journal entry recorded with equal debit and credit amounts?
3. A customer pays Rs 5,000 on account. Which accounts are debited and credited?

Homework

• Write journal entries for: the owner invests Rs 50,000 cash, and the business buys furniture for Rs 8,000 on credit.

• Explain in three lines why a journal entry must always balance.

Time Allocation

40 minutes
